

## DESIGNING A LASTING IMPRESSION

Brick Dye is your local, trusted masonry staining company, using the masonry staining system that's proven to last. Our stain chemically bonds with masonry, and absorbs into the pore structure, so it will never peel, crack or require maintenance.

Because they are translucent and completely absorbed, our stains preserve the natural variation in tone as well as the natural texture of the pre-existing masonry. They never produce an unnatural shine. We can mix them to match a single shade expertly, or create complex patterns with multiple stain recipes.
